Notation of minutes stays the same as regular time. Hours and minutes may be notated either as hours:minutes or hoursminutes. For example, 3:47 p.m. may be notated as 15:47 or 1547.

Note: If your shift extends to the next day, please use the **48-hour military time cycle** when recording your time in and time out. This means that instead of resetting to 0000 after midnight, you will continue counting the hours beyond 2400 to properly reflect the extended shift.

For example:

- If your shift starts at 8:00 p.m. (2000) and ends at 4:00 a.m. the next day, you should record your time out as **2800** instead of 0400.

This ensures accurate documentation of working hours and avoids confusion in time computation.

Please refer to the 48 cycle Military Time Conversion Chart below for guidance.
